

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

		EYFS	Y1	Y2	Y3	Y4	Y5	Y6
<p>Know and use numbers This concept involves understanding the number system and how they are used in a wide variety of mathematical ways.</p>	Counting	Verbally count beyond 20, recognising the pattern of the counting system.	Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number. Count, read and write numbers to 100 in numerals. Given a number, identify one more and one less.	Count in steps of 2, 3, 5 and 10 from 0 or 1 and in tens from any number, forward and backward	Count in multiples of 2 to 9, 25, 50, 100 and 1000. Find 1000 more or less than a given number.	Count backwards through zero to include negative numbers.	Read numbers up to 10 000 000.	Use negative numbers in context and calculate intervals across zero.
	Representing	Subitise (recognise quantities without counting) up to 5.	Identify, represent and estimate numbers using different representations, including the number line. Read and write numbers initially from 1 to 20 in numerals and in words.	Read and write numbers initially from 1 to 100 in numerals and in words.	Identify, represent and estimate numbers using different representations.	Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	Write numbers up to 10 000 000	Read Roman numerals to 1000 (M) and recognise years written in Roman numerals.

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

	Comparing	Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.	Use the language of: equal to, more than, less than (fewer), most and least.	Compare and order numbers from 0 up to 100; use $<$, $>$ and $=$ signs.	Order and compare numbers beyond 1000.		Order and compare numbers up to 10 000 000.	
	Place Value	Have a deep understanding of number to 10, including the composition of each number.	N/A	Recognise the place value of each digit in a two-digit number (tens, ones).	Recognise the place value of each digit in a four-digit number. (thousands, hundreds, tens, and ones)	Round any number to the nearest 10, 100 or 1000.	Round any whole number to a required degree of accuracy.	Determine the value of each digit in any number.
	Solving Problems	N/A	N/A	Use place value and number facts to solve problems.	Solve number and practical problems with increasingly large positive numbers.	Solve two-step addition and subtraction problems in contexts, deciding which operations and methods to use and why.	Solve number and practical problems.	Solve number and practical problems.

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

		YR	Y1	Y2	Y3	Y4	Y5	Y6
<p>Add and subtract This concept involves understanding both the concepts and processes of addition and subtraction.</p>	Complexity	N/A	<p>Solve one-step problems with addition and subtraction: Using concrete objects and pictorial representations including those involving numbers, quantities and measures.</p>	<p>Using the addition (+), subtraction (-) and equals (=) signs.</p> <p>Applying their increasing knowledge of mental and written methods.</p>	<p>Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.</p>	<p>Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.</p>	<p>Solve multi-step addition and subtraction problems in contexts, deciding which operations and methods to use and why.</p>	
	Methods	N/A	<p>Add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> • One-digit and two-digit numbers to 20, including zero. • A two-digit number and ones. • A two-digit number and tens. • Two two-digit numbers. 	<p>Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.</p>	<p>Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate.</p>	<p>Add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> • A three-digit number and ones. • A three-digit number and tens. • A three-digit number and hundreds. 	<p>Add and subtract whole numbers with more than 4 digits, including using formal written methods. (columnar addition and subtraction)</p>	<p>Add and subtract numbers mentally with increasingly large numbers.</p>

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

			<ul style="list-style-type: none"> • Adding three one-digit numbers. 					
	Checking	N/A	N/A	Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	Estimate and use inverse operations to check answers to a calculation.	Estimate and use inverse operations to check answers to a calculation.	Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.	
	Using number facts	Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.	Represent and use number bonds and related subtraction facts within 20.	Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100.	Solve problems, including missing number problems, using number facts, place value and more complex addition and subtraction.	Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.	Add and subtract negative integers.	

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

		YR	Y1	Y2	Y3	Y4	Y5	Y6
<p>Multiply and divide This concept involves understanding both the concepts and processes of multiplication and division.</p>	Complexity	N/A	Solve one-step (two-step at greater depth) problems involving multiplication and division.	Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in context.	Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.	Solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.	Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.	Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates. Use knowledge of the order of operations to carry out calculations involving the four operations.
	Methods	N/A	N/A	Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs. Show that multiplication of two numbers can be done in any order (commutative)	Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.	Multiply two-digit and three-digit numbers by a one-digit number using formal written layout. Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.	Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers. Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders	Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication. Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions,

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

				<p>and division of one number by another cannot.</p> <p>Solve problems involving multiplication and division using mental methods.</p>		<p>Recognise and use factor pairs and commutativity in mental calculations.</p>	<p>appropriately for the context.</p>	<p>or by rounding, as appropriate for the context.</p> <p>Perform mental calculations, including with mixed operations and large numbers.</p>
	<p>Using multiplication and division facts</p>	<p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.</p>	<p>Recognise odd and even numbers.</p>	<p>Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables .</p> <p>Use multiplication and division facts to solve problems.</p>	<p>Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables.</p>	<p>Recall multiplication and division facts for multiplication tables up to 12×12.</p>	<p>Identify common factors, common multiples and prime numbers.</p> <p>Establish whether a number up to 100 is prime and recall prime numbers up to 19.</p> <p>Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.</p> <p>Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).</p>	

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

							Solve problems involving multiplication and division including using knowledge of factors and multiples, squares and cubes.

		YR	Y1	Y2	Y3	Y4	Y5	Y6
<p>Fractions This concept involves understanding the concept of part and whole and ways of calculating using it.</p>	Recognising fractions		<p>Recognise, find and name a half as one of two equal parts of an object, shape or quantity.</p> <p>Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.</p>	<p>Recognise, find, name and write fractions $\frac{1}{2}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a length, shape, set of objects or quantity.</p>	<p>Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and dividing one-digit numbers or quantities by 10.</p> <p>Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.</p> <p>Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.</p> <p>Add and subtract fractions with the same denominator within one whole.</p> <p>Compare and order unit fractions, and</p>	<p>Recognise and show, using diagrams, families of common equivalent fractions.</p> <p>Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.</p> <p>Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number.</p> <p>Add and subtract fractions with the same denominator.</p> <p>Find the effect of dividing a one- or</p>	<p>Compare and order fractions whose denominators are all multiples of the same number.</p> <p>Compare and order fractions, including fractions > 1.</p> <p>Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number.</p> <p>Round decimals with two decimal places to the nearest whole number and to one decimal place.</p> <p>Read, write, order and compare numbers with up to three decimal places.</p>	<p>Identify the value of each digit in numbers given to three decimal places.</p> <p>Solve problems involving number up to three decimal places.</p> <p>Recognise the percent symbol (%) and understand that percent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.</p>

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

					fractions with the same denominators.	two-digit number by 10 and 100, Identifying the value of the digits in the answer as ones, tenths and hundredths. Round decimals with one decimal place to the nearest whole number. Compare numbers with the same number of decimal places up to two decimal places.		
	Equivalence	N/A	N/A	Write simple fractions for example, $\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$	Recognise and show, using diagrams, families of common equivalent fractions.	Recognise and write decimal equivalents of any number of tenths or hundredths. Recognise and write decimal equivalents to $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$.	Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths. Read and write decimal numbers as fractions.	Associate a fraction with division and calculate decimal fraction equivalents. Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

							Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents. Use common factors to simplify fractions; use common multiples to express fractions in the same denomination.	
	Solving problems	N/A	N/A	Write simple fractions for example, $\frac{1}{2}$ of $6 = 3$.	<p>Add and subtract fractions with the same denominator within one whole.</p> <p>Solve problems involving increasingly harder fractions.</p> <p>Calculate quantities and fractions to divide quantities (including non-unit fractions where the answer is a whole number).</p>	<p>Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.</p> <p>Solve simple measure and money problems involving fractions and decimals to two decimal places.</p>	<p>Add and subtract fractions with the same denominator and denominators that are multiples of the same number.</p> <p>Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.</p> <p>Multiply proper fractions and mixed numbers by whole numbers, supported</p>	<p>Multiply simple pairs of proper fractions, writing the answer in its simplest form.</p> <p>Solve problems which require knowing percentage and decimal equivalents of, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a multiple of 10 or 25.</p> <p>Divide proper fractions by whole numbers.</p>

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

					Add and subtract fractions with the same denominator.		by materials and diagrams. Solve problems involving similar shapes where the scale factor is known or can be found. Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.	Multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places. Ratio and proportion Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts. Solve problems involving the calculation of percentages and the use of percentages for comparison.

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

	YR	Y1	Y2	Y3	Y4	Y5	Y6	
<p>Understand the properties of shapes This concept involves recognising the names and properties of geometric shapes and angles.</p>		Recognise and name common 2D and 3D shapes.	<p>Identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line.</p> <p>Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces.</p> <p>Identify 2-D shapes on the surface of 3-D shapes.</p> <p>Compare and sort common 2-D and 3-D shapes and everyday objects.</p>	<p>Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle.</p> <p>Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</p>	<p>Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them.</p> <p>Recognise angles as a property of shape or a description of a turn.</p> <p>Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle.</p> <p>Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</p>	<p>Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes.</p> <p>Identify acute and obtuse angles and compare and order angles up to two right angles by size.</p> <p>Identify lines of symmetry in 2-D shapes presented in different orientations.</p> <p>Complete a simple symmetric figure with respect to a specific line of symmetry.</p>	<p>Identify 3-D shapes, including cubes and other cuboids, from 2-D representations.</p> <p>Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.</p> <p>Draw given angles, and measure them in degrees ($^{\circ}$).</p> <p>Identify:</p> <ul style="list-style-type: none"> • Angles at a point and one whole turn (total 360°). • Angles at a point on a straight line and a turn (total 180°). • Other multiples of 90°. <p>Use the properties of rectangles to deduce related facts and find missing lengths and angles.</p>	<p>Draw 2-D shapes using given dimensions and angles.</p> <p>Recognise, describe and build simple 3-D shapes, including making nets.</p> <p>Compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons.</p> <p>Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius.</p> <p>Recognise angles where they meet at a point, are on a</p>

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

							Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.	straight line, or are vertically opposite and find missing angles.
<p>Describe position, direction and movement This concept involves recognising various types of mathematical movements.</p>			Describe position, direction and movement, including whole, half, quarter and three-quarter turns.	Order and arrange combinations of mathematical objects in patterns and sequences. Use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise).	Recognise angles as a property of shape and as an amount of rotation. Identify right angles, recognise that 2 right angles make a half turn and 4 make a whole turn. Identify angles that are greater than a right angle.	Describe positions on a 2-D grid as coordinates in the first quadrant. Describe movements between positions as translations of a given unit to the left/right and up/down. Plot specified points and draw sides to complete a given polygon.	Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.	Describe positions on the full coordinate grid. (all four quadrants) Draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
<p>Use measures This concept involves becoming familiar with a range of measures, devices</p>			Compare, describe and solve practical problems for: •lengths and heights •mass/weight	Use standard units to estimate and measure length/height (m/cm);	Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).	Convert between different units of measure. (for example, kilometre to metre; hour to minute)	Convert between different units of metric measure. Understand and use approximate	Solve problems involving converting between units of time.

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

used for measuring and calculations.			<ul style="list-style-type: none"> •capacity and volume •time. <p>Measure and begin to record:</p> <ul style="list-style-type: none"> •lengths and heights •mass/weight •capacity and volume •time (hours, minutes, seconds) <p>Recognise and know the value of different denominations of coins and notes.</p> <p>Sequence events in chronological order using language.</p> <p>Recognise and use language relating to dates, including days of the week, weeks, months and years.</p> <p>Tell the time to the hour and half past the hour and draw</p>	<p>mass (kg/g); temperature ($^{\circ}\text{C}$); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels.</p> <p>Compare and order lengths, mass, volume/capacity and record the results using $>$, $<$ and $=$.</p> <p>Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value.</p> <p>Find different combinations of coins that equal the same amounts of money.</p> <p>Solve simple problems in a practical context involving</p>	<p>Measure the perimeter of simple 2-D shapes.</p> <p>Add and subtract amounts of money to give change. (£ and p)</p> <p>Tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks.</p> <p>Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use appropriate vocabulary.</p> <p>Know the number of seconds in a minute and the number of days</p>	<p>Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres.</p> <p>Find the area of rectilinear shapes by counting squares.</p> <p>Estimate, compare and calculate different measures, including money in pounds and pence.</p> <p>Read, write and convert time between analogue and digital 12- and 24-hour clocks.</p> <p>Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.</p>	<p>equivalences between metric units and common imperial units such as inches, pounds and pints.</p> <p>Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres.</p> <p>Calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm^2) and square metres (m^2) and estimate the area of irregular shapes.</p> <p>Estimate volume and capacity.</p>	<p>Use all four operations to solve problems involving measure (for example, length, mass, volume, money) using decimal notation, including scaling.</p> <p>Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.</p> <p>Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation up to three decimal places.</p>
--------------------------------------	--	--	--	---	---	--	---	--

St. Joseph's Catholic Primary School Mathematics Curriculum Phases Overview

			<p>the hands on a clock face to show these times.</p>	<p>addition and subtraction of money of the same unit, including giving change. Compare and sequence intervals of time.</p> <p>Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.</p> <p>Know the number of minutes in an hour and the number of hours in a day.</p>	<p>in each month, year and leap year.</p> <p>Compare durations of events.</p>			<p>Convert between miles and kilometres.</p> <p>Recognise that shapes with the same areas can have different perimeters and vice versa.</p> <p>Recognise when it is possible to use formulae for area and volume of shapes.</p> <p>Calculate the area of parallelograms and triangles.</p> <p>Calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm³) and cubic metres (m³), and extending to other units.</p>
<p>Use statistics This concept involves</p>			N/A	<p>Interpret and construct simple pictograms, tally</p>	<p>Interpret and present data using bar charts,</p>	<p>Interpret and present discrete and continuous data</p>	<p>Solve comparison, sum and difference problems</p>	<p>Interpret and construct pie charts and line graphs and</p>
